

# Progress Report Number 1

Name: **Harleen Kaur**

Student Id: **300389855**

Project Name: **W25\_3375\_S1\_G8\_StudentCommunity**

Date	No of hours	Description of work done
Jan 20, 2025	2	Worked on Douglas connect and Douglas live ideas.
Jan 23, 2025	1.5	Received feedback from the team and changes were made in this idea.
Jan 24, 2025	2	Discuss the idea with the Professor and combine the two ideas to provide a better transformative experience.
Jan 29, 2025	2.5	Identified the competition of the proposed application and worked on how to make the application more appealing than the competition.
Jan 31, 2025	1.5	Work discussion about things to include and gathered more information about project novelty and transformative experience. (Group discussion)
Feb 4, 2025	2.5	Meeting with Professor and dropped existing ideas and changes were made according to feedback
Feb 7, 2025	2	Worked on documentation back research, features, contract and application novelty. (Group discussion)

Feb 8, 2025	1	Reviewed the project proposal document file.
Feb 14, 2025	1	Group meeting to figure out how to move forward with the task in hand.
Feb 17, 2025	2.5	Figma prototype basics and followed YouTube tutorials about Figma.
Feb 20, 2025	1.5	Using project requirements, I tried to make rough outline or screen according to my own knowledge.
Feb 21, 2025	3.5	- Group Meeting for analysis of different templates - Team helped to make changes in already created screens by me on Feb 20.
Feb 26, 2025	1	- I tried to make to further improved designs and shared with team to get feedback.
Feb 27, 2025	1.5	Helped team to choose different set of questions that can be included in the survey.
Mar 4, 2025	1.5	Virtual Meeting with the professor - Got feedback from the professor and made some changes in the questions of the survey.

**Description of Actual work done: -**

- Week1(From Jan 20- Jan 26):  
This week, I worked on refining the concepts for "Douglas Connect" and "Douglas Live." I spent time developing both ideas and shared them with my team for feedback. After receiving input, we made some necessary changes to enhance the ideas. After refining the concept, we had a meeting with a professor to evaluate the ideas. After getting the feedback, my team mate and I decided to combine the idea and create a better one.

- Week2(From Jan 27-Feb 2)

This week, I focused on identifying the competition for the proposed application and worked on strategies to make it more efficient. I analyzed the features offered by the competitors and brainstormed ways to improve our app. We also held a group discussion to refine the ideas and gather more information about how to make the project innovative and transformative.

- Week3(From Feb 3-Feb 9)

This week, we finally had one final idea and we organized a meeting with the professor where we proposed our final idea and made significant changes to the project based on the feedback received. Then I worked on documentation, including research, features, and the overall novelty of the app. And then finally reviewed the project proposal document to make sure everything is correct.

- Week4(From Feb 10-Feb 16)

During this week, my team mate and I held a meeting to figure out what we should do next, and decided to focus more on Figma from onwards.

- Week 5 (From Feb 17-Feb 23)

This week I started to learn the basics of Figma by following the YouTube tutorials. Then I tried to create some rough designs as per the requirements of our project and shared it with my team mate. After that we did a group discussion regarding my designs and analyzed some other design templates similar to our app and tried to do some changes in my designs.

- Week 6(Feb 24-March 2)

After getting the feedback from my team mate, I did some improvements in my designs and shared it with Gurbinder to get the feedback. Along with designs, we started working on the survey questionnaire. We did some discussion and based on that we created a rough survey.

- Week 7(March 3- Present)

After creating a draft survey, we arranged a meeting with a professor to get some feedback on the questionnaire and based on the feedback, my team mate changed some questions.
